Macro developments

- As per FADA, India's auto sales rose at a much slower pace of 14.5% in Aug'21 from 34.1% in Jul'21. Even PV and two-wheeler sales moderated by 38.7% (63% in Jul'21) and 6.6% (28% in Jul'21) respectively in Aug'21. Auto retail sales declined over a 2-year horizon to 14.7% in Aug'21, signalling subdued demand. Further, shortage of semi-conductors has added to supply side challenges. This is likely to pose additional risk in the upcoming festive season.
- China's exports surprised positively, rising by 25.6% in Aug'21 (est.: 17.3%) from 19.3% in Jul'21. The rebound was driven by higher exports of electronics, furniture and recreational products. In addition, clearing of congestion at some ports, which had earlier been shut down for 2 weeks due to surge in Covid-19 cases also helped. Imports too improved in Aug'21, rising by 33.1% (est.: 26.9%) from 28.1% in Jul'21. While semi-conductor imports continued to decline, that of agriculture commodities, industrial metals, and oil rose sharply.
- Germany's factory orders rose unexpectedly by 3.4% in Jul'21 versus an estimated decline of 0.7% on a MoM basis. In Jun'21, factory orders had risen by 4.6%. The level of new orders inched up to a record high in Jul'21, led by a surge in foreign orders (8% increase MoM). Orders from the shipbuilding sector rose steeply. Orders for consumer goods (7.5%) and capital goods (5.4%) also increased.
