Less aggressive monetary tightening by Fed owing to easing of CPI print, prompted dollar to drop to its lowest level since Jun'22. China's house prices dropped for the 8-month in a row (1.5% in Dec'22) led by weaker demand due to Covid-19 outbreak. However, with the removal of Zero-Covid-19 policy and other measures by government, the property sector is expected to recover steadily. This week, BoJ's is likely to tweak changes in the yield curve control (YCC) policy in its upcoming meet. China's industrial output and GDP report will be tracked closely. Elsewhere, markets will also monitor statements by policy makers and central bank heads as they gather for World Economic Forum at Davos.

- Barring Nikkei, other equity indices closed higher. Cool-off of US CPI offered hopes of possible peaking of interest rates in the coming months by Fed. Germany's GDP inched up by 1.9% for CY22 and analysts now expect the economy might even dodge recession for CY23, despite difficult conditions. This further boosted investor sentiments. Both Hang Seng and Shanghai Comp rose by 1% each. Sensex too ended in green led by gains in metal and IT stocks. It is trading higher today, while other Asian stocks are trading mixed.

- Except EUR (lower), other global currencies strengthened on account of a weaker dollar due to softening of US CPI print. JPY gained the most by 1.1% as reports suggested that BoJ may further tweak its yield control policy. INR rose by 0.4% supported by FII inflows. It is trading higher today, while other Asian currencies are trading lower following Japan's strong PPI data.

- Global 10Y yields closed higher. Risk on sentiment improved with better than expected GDP data in Germany, falling 1 year inflation expectation in the US and improved consumer sentiment, as highlighted in the University of Michigan survey results. Fed Reserve Bank of Philadelphia also spoke of inflation passing its peak. India's 10Y yield rose a tad by 1bps (7.30%). It is trading at 7.31% today.
