Asian markets were rattled over news reports that majority of China's cities are predicting a Covid-19 peak in Jan'23. In a relief, the University of Michigan's inflation expectation data showed some cooling off. Even PCE data, which is closely watched by Fed showed some softening. On the other hand, macro indicators in the US remained buoyant with new home sales data coming in better than expected. Even the core capital goods data, a close proxy of business fixed investment rose more than expected. In Japan, 40-year high core inflation data implied that finally pass through of price pressure to consumers is happening and in the coming days BoJ's move will be closely watched. Domestic market in the current week will eye month end data releases (fiscal, eight core, credit data).

- Except US and UK, other global indices gained. Easing PCE inflation in the US, raised expectations that the Fed may soften its stance. Asian stocks however extended their decline, amidst concerns over the Covid-19 situation in China. Sensex declined sharply by 1.6%. Power and metal stocks shed the most. It is trading higher today, while other Asian stocks are trading mixed.

- Global currencies were mixed. DXY fell by 0.1% amidst a deceleration in US core PCE index, suggesting a less aggressive stance from the Fed. EUR and GBP gained by 0.2% and 0.1% respectively. On the other hand, JPY fell by 0.4% as Japan's inflation rose to a 40-year high. INR depreciated by 0.1% as oil prices increased. However, it is trading stronger today, in line with other Asian currencies.
