Reports that Western countries are mulling fresh sanctions on Russia, including possible ban on Russian coal and oil imports once again cast a shadow on global recovery. Oil prices rose by 3% to US\$ 107.5/bbl on supply concerns. Investors are also awaiting FOMC minutes, to assess the possibility of a 50bps rate hike by Fed in its next meeting. On the domestic front, bond yields have risen sharply in recent times and investors await cues from RBI policy.

FTSE too ended higher by 0.3%. Sensex also rose by 2.3%, supported by strong gains in banking and power stocks. However, it is trading lower today, while other Asian stocks are trading mixed.
