Annual Financial Statements for the year ended 31 March 2023

Directors' Responsibilities and Approval

The directors are required in terms of the Banking Act (46:04) and Companies Act (42:01) to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the bank as at the end of the financial year and the results of its operations and cash flows for the period then ended, in conformity with International Financial Reporting Standards. The external auditors are engaged to express an independent opinion on the annual financial statements.

The annual financial statements are prepared in accordance with International Financial Reporting Standards and are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The directors acknowledge that they are ultimately responsible for the system of internal financial control established by the bank and place considerable importance on maintaining a strong control environment. To enable the directors to meet these responsibilities, the board sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the bank and all employees are required to maintain the highest ethical standards in ensuring the bank's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the bank is on identifying, assessing, managing and monitoring all known forms of risk across the bank. While operating risk cannot be fully eliminated, the bank endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The directors are of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

The directors have reviewed the bank's cash flow forecast for the year to 31 March 2024 and, in light of this review and the current financial position, they are satisfied that the bank has or had access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently auditing and reporting on the bank's annual financial statements. The annual financial statements have been examined by the bank's external auditors and their report is presented on pages 7 to 9.

The annual financial statements set out on pages 10 to 67, which have been prepared on the going concern basis, were approved by the board on 14 July 2023 and were signed on their behalf by:

Chairman
S Bagopi

Managing Director
S Joshi

Annual Financial Statements for the year ended 31 March 2023

Director's Report

The directors have pleasure in submitting their 23 report on the annual financial statements of Bank of Baroda (Botswana) Limited for the year ended 31 March 2023.

In 2022, global economic performance and sentiment were negatively affected mostly by the ripple effects of the Russia-Ukraine war, global monetary policy tightening and the lingering effects of the COVID-19 pandemic, particularly zero-COVID policies and lockdowns in China.

Led by the water and electricity, diamond, and mining sectors, GDP experienced a robust 5.9% annual expansion in Q4 2022. As a result, the economy grew by 5.8% in 2022, approximately half of 2021's growth rate.

Inflation remained above the Central Bank's medium-term objective range(3.0–6.0%) in 2022, averaging 12.2 percent in 2022. With the increase of the MoPR (Monetary Policy Rate) which became policy in place of earlier Bank Rate by a cumulative 1.51 percentage points to 2.65 percent in 2022, prime lending rate of commercial banks increased from 5.25 percent to 6.76 percent in the same period.

The Central Bank (Bank of Botswana) maintained an accommodative monetary policy stance during 2022 in view of the positive inflation outlook in the medium term.

1. Background

Bank of Baroda (Botswana) Limited was incorporated in Botswana on 17th August 2000 as a Company with limited liability under the Companies Act (CAP 42:01) and was licensed as a Commercial Bank on 06th September 2000 under Section 6 of the Banking Act, 1995. The Bank is wholly owned subsidiary of Bank of Baroda, India. It started its operations by opening its first branch at Acumen Park, Plot 50370, Fairgrounds, Gaborone, Botswana on 26 March 2001. The Bank shifted to the existing premises at A.K.D. House, Lot 1108, The Main Mall, Gaborone in January 2005. The second branch of the Bank was opened in Francistown on 5 Dec.2007. The third branch of the Bank was opened in Gaborone Industrial Area (G-West) on 22 Feb 2013. Fourth branch of the Bank was opened in Palapye on 16 Mar 2020.

2. Activities

The Bank continues to be engaged in the business of commercial banking and provides a wide array of financial services.

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Director's Report

3. Business performance

The business of the Bank reported positive growth of about 17.15 % during the year. The growth remains high to previous year due to higher growth in Credit and Term Deposits.

This year net profit of the Bank stood at P 73.42 mn for the year as compared to P 59.41 mn during the previous year showing a positive growth over last year mainly due to increase in interest income in Loans and advances, containment of impairment and controlling cost.

Asset Quality of the bank has improved during the year. The gross NPLs to total advances was 0.45 % as against 0.76 % in March 2022. Bank was able to arrest fresh NPLs and fresh NPLs were P 1.26 mn in the year.

Key financials during 2022-23

- The total business of the Bank grew by 17.15% during the year.
- The total deposit grew from P1910.91 mn to P2299.11 mn during FY 2022-23 up by 20.34%.
- The total advances grew from P1585.84 mn to P1803.50 mn during the FY 2022-23 up by 13.73%.
- CD ratio is 81.34 % as on 31 March 2023.
- Capital Adequacy ratio stood at 22.89 % against regulatory requirement of 12.50%
- The cost of deposits stood at 3.14% in March 23 as compared to 2.28% during the year.
- The yield on advances was at 8.83% as against 7.55 % last year.
- Net worth of the Bank as on 31 March 2023 is P506.63 mn.
- Business per employee has increased to P63.86 mn as on 31.03.2023 from P55.36 mn on 31.03.2022.
- Gross profits of the Bank reported a growth of 30.40% and reached P98.36mn as against last years figure of P75.43 mn.
- Net profit of the Bank has increased to P73.42 mn in 2022-23 from P59.41 Mn in last year i.e. a growth of 23.58 %
- Net Interest Margin was 4.31 % in the year as against 4.22% in 2022.
- The cost to income ratio has decreased to 29.78 % against 30.49 % last year.
- Gross NPLs decreased from P12.56 mn to P08.42 mn, whereas the Net NPLs is NIL.
- Banks NPL provisions coverage ratio is 100%.

New Initiatives during the Year:

- New version of Internet Banking i.e. FEBA- I-Banking
- Bank has introduced Green PIN for Debit card through ATM and for Internet banking applications through SMS and Email on registrar mobile number and registered email address
- Registration and de-registration and Mobile Banking PIN change through ATM.
- Biometric Authentication by staff members while login in core banking System in order to enhance the security.
- Implementation of New Alert Monitoring System

Full details of the financial position, results of operations and cash flows of the bank are set out in these annual financial statements.

Independent Auditor's Report

To the shareholders of Bank of Baroda (Botswana) Limited

Opinion

We have audited the annual financial statements of Bank of Baroda (Botswana) Limited set out on pages 10 to 65, which comprise the statement of financial position as at 31 March 2023, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the annual financial statements, including a summary of significant accounting policies.

In our opinion, the annual financial statements present fairly, in all material respects, the financial position of Bank of Baroda (Botswana) Limited as at 31 March 2023, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Banking Act (46:04).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the annual financial statements section of our report. We are independent of the bank in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (Parts 1, 3 and 4A) (IESBA Code) and other independence requirements applicable to performing audits of annual financial statements in Botswana. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code and in accordance with other ethical requirements applicable to performing audits in Botswana. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the annual financial statements of the current period. These matters were addressed in the context of our audit of the annual financial statements as a whole, and in forming Our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matters	How our audit addressed the key audit matter
<p>The assessment for loan loss provision for loans to customers</p> <p>The credit impairment provision inherently contains a significant amount of estimation uncertainty especially with regard to identifying impaired receivables and quantifying loan impairment because significant judgement is required of management regarding inputs into the calculation.</p> <p>To assess the amount of provisions for expected losses, the bank applies statistical models with input parameters, obtained from internal and external sources.</p>	<p>Our audit procedures included considering the appropriateness of the loans and advances impairment provision. We assessed the adequacy of the methodology used by the Bank to identify loan impairment and calculate provision for the selected significant portfolios. On a sample of the Bank's loans we evaluated appropriateness of provisioning methodologies and application</p>

Partners

Kalyanaraman Vijay (Managing), Aswin Vaidyanathan*, Madhavan Venkatachary*, Anthony Quashie, Sunny K Mulakulam*,
Aparna Vijay* (*Indian)

<p>In accordance with the requirements of IFRS 9, the Bank distinguishes three stages of impairment, where the criteria for classification to individual stages is based on an assessment of the objective characteristics of loans and relevant debtors, and subjective judgements of the bank.</p> <p>Impairment stage III includes distressed loans and advances where significant increase in credit risk has occurred and where objective proof of impairment exists. When determining the provision amount this impairment stage, the Bank management primarily considers the following factors:</p> <ul style="list-style-type: none"> • Amount and timing of forecasted cash flows. • The bank's success rate at recovering debt • Collateral value <p>In addition to the above-identified impairments, an estimate is made for impairments associated with those assets in the statement of financial position where no repayment difficulties have been identified for a particular loan (Stage I and Stage II).</p> <p>The bank creates a provision using a model for a homogeneous group of loans. The model is based on deriving the probability of loan default and the estimated amount of subsequent loss. Management's judgement determines input data for the model, the calculation logic and its comprehensiveness.</p>	<p>Our audit response focused on the significant inputs used by management in their impairment calculation. We formed an independent view on levels of provisions required by examining available external and internal information. We assessed the appropriateness of the methodologies and assumptions used, to the extent that this could have materially impacted the estimations around the timing and amount of the future cash flows. We compared this to our own methodologies and available industry data.</p> <p>We also performed an independent calculation of the impairment provision and relevant inputs in the models used by management to estimate the future cash flows, discount rate as well as management's other adjustments.</p>
--	---

Other information

The directors are responsible for the other information. The other information comprises the Director's Report and the Detailed Income Statement, which we obtained prior to the date of this report. Other information does not include the annual financial statements and our auditor's report thereon.

Our opinion on the annual financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Annual Financial Statements

The directors are responsible for the preparation and fair presentation of the annual financial statements in accordance with International Financial Reporting Standards and the requirements of the Banking Act (46:04), and for such internal control as the directors determine is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the directors are responsible for assessing the bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the bank or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the bank's financial reporting process

Auditor's responsibilities for the audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the annual financial statements of the current year and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1. Significant accounting policies

The principal accounting policies applied in the preparation of these annual financial statements are set out below.

1.1 Basis of preparation

The annual financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these annual financial statements and the Banking Act (46:04).

The annual financial statements have been prepared on the historic cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in Pula, which is the bank's functional currency and rounded off to the nearest thousands.

These accounting policies are consistent with the previous period, except for the changes set out in note 2.

1.2 Significant judgements and sources of estimation uncertainty

The preparation of annual financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

Revenue recognition

In making their judgement, management considered the detailed criteria for the recognition of revenue set out in IFRS 15 and, in particular, whether the bank had met all the performance obligations relating to non interest income.

Key sources of estimation uncertainty

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The bank uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the bank's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. For details of the key assumptions and inputs used, refer to the individual notes addressing financial assets.

Fair value estimation

Several assets and liabilities of the bank are either measured at fair value or disclosure is made of their fair values.

Observable market data is used as inputs to the extent that it is available.

Impairment testing

The bank reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. When such indicators exist, management determine the recoverable amount by performing value in use and fair value calculations. These calculations require the use of estimates and assumptions. When it is not possible to determine the recoverable amount for an individual asset, management assesses the recoverable amount for the cash generating unit to which the asset belongs.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.2 Significant judgements and sources of estimation uncertainty (continued)

Useful lives of property, plant and equipment

Management assess the appropriateness of the useful lives of property, plant and equipment at the end of each reporting period. The useful lives of motor vehicles, furniture and computer equipment are determined based on bank replacement policies for the various assets. Individual assets within these classes, which have a significant carrying amount are assessed separately to consider whether replacement will be necessary outside of normal replacement parameters.

When the estimated useful life of an asset differs from previous estimates, the change is applied prospectively in the determination of the depreciation charge.

Impact of CoVID-19 Pandemic

The CoVID 19 pandemic has caused significant economic distress to the world as a whole and impacts the bank's provisioning under the IFRS 9 ECL requirements. The bank uses all reasonable and supportable information that is available to it without undue cost or effort when applying IFRS 9, instead of relying on some mechanistic criterion (for example, treating payment holidays as automatic evidence of a significant increase in credit risk) to determine movements in ECL.

Taxation

Judgement is required in determining the provision for income taxes due to the complexity of legislation. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Bank recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

The bank recognises the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires the bank to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the bank to realise the net deferred tax assets recorded at the balance sheet date could be impacted.

1.3 Property, plant and equipment

Property, plant and equipment are tangible assets which the bank holds for its own use or for rental to others and which are expected to be used for more than one year.

An item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the bank, and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Expenditure incurred subsequently for major services, additions to or replacements of parts of property, plant and equipment are capitalised if it is probable that future economic benefits associated with the expenditure will flow to the bank and the cost can be measured reliably. Day to day servicing costs are included in profit or loss in the year in which they are incurred.

Property, plant and equipment is subsequently stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the bank. Leased assets are depreciated in a consistent manner over the shorter of their expected useful lives and the lease term. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.3 Property, plant and equipment (continued)

Item	Depreciation method	Average useful life
Leasehold property	Straight line	Over the lease period
Office equipments	Straight line	4-10 years
Furniture and fixtures	Straight line	6-10 years
Motor vehicles	Straight line	4 years
IT equipment	Straight line	3 years
Computer software	Straight line	3 years
Leasehold improvements	Straight line	Over the lease period

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Impairment tests are performed on property, plant and equipment when there is an indicator that they may be impaired. When the carrying amount of an item of property, plant and equipment is assessed to be higher than the estimated recoverable amount, an impairment loss is recognised immediately in profit or loss to bring the carrying amount in line with the recoverable amount.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.4 Financial instruments

Financial instruments held by the bank are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the bank, as applicable, are as follows:

Financial assets which are debt instruments:

- Amortised cost.

Financial liabilities:

- Amortised cost

Note 30 Financial instruments and risk management presents the financial instruments held by the bank based on their specific classifications.

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

The specific accounting policies for the classification, recognition and measurement of each type of financial instrument held by the bank are presented below:

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

Financial instruments (continued)

Financial instruments at amortised cost

Classification

Cash and cash equivalents, balances with banks, financial assets - investments and loans and advances (note 7) are classified as financial assets subsequently measured at amortised cost.

They have been classified in this manner because the contractual terms of these loans give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the year's business model is to collect the contractual cash flows on these loans.

Recognition and measurement

Financial assets are recognised when the bank becomes a party to the contractual provisions of the loan. The loans are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the loan initially, minus principal repayments, plus cumulative amortisation (interest) using the effective interest method of any difference between the initial amount and the maturity amount, adjusted for any loss allowance.

Application of the effective interest method

Interest income is calculated using the effective interest method, and is included in profit or loss in interest and similar income.

The application of the effective interest method to calculate interest income on a financial asset measured at amortised cost is dependent on the credit risk of the loan as follows:

- The effective interest rate is applied to the gross carrying amount of the loan, provided the loan is not credit impaired. The gross carrying amount is the amortised cost before adjusting for a loss allowance.
- If a loan is purchased or originated as credit-impaired, then a credit-adjusted effective interest rate is applied to the amortised cost in the determination of interest. This treatment does not change over the life of the loan, even if it is no longer credit-impaired.
- If a loan was not purchased or originally credit-impaired, but it has subsequently become credit-impaired, then the effective interest rate is applied to the amortised cost of the loan in the determination of interest. If, in subsequent periods, the loan is no longer credit impaired, then the interest calculation reverts to applying the effective interest rate to the gross carrying amount.

Loans denominated in foreign currencies

When a loan receivable is denominated in a foreign currency, the carrying amount of the loan is determined in the foreign currency. The carrying amount is then translated to the Pula equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating income (note 19).

Details of foreign currency risk exposure and the management thereof are provided in the specific loan notes and in the financial instruments and risk management (note 30).

Impairment

The bank recognises a loss allowance for expected credit losses on all loans receivable measured at amortised cost. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective loans.

The bank measures the loss allowance at an amount equal to lifetime expected credit losses (lifetime ECL) when there has been a significant increase in credit risk since initial recognition. If the credit risk on a loan has not increased significantly since initial recognition, then the loss allowance for that loan is measured at 12 month expected credit losses (12 month ECL).

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a loan. In contrast, 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a loan that are possible within 12 months after the reporting date.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

Financial instruments (continued)

In order to assess whether to apply lifetime ECL or 12 month ECL, in other words, whether or not there has been a significant increase in credit risk since initial recognition, the bank considers whether there has been a significant increase in the risk of a default occurring since initial recognition rather than at evidence of a loan being credit impaired at the reporting date or of an actual default occurring.

Significant increase in credit risk

In assessing whether the credit risk on a loan has increased significantly since initial recognition, the bank compares the risk of a default occurring on the loan as at the reporting date with the risk of a default occurring as at the date of initial recognition.

The bank considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the counterparties operate, obtained from economic expert reports, financial analysts, governmental bodies, relevant think-tanks and other similar organisations, as well as consideration of various external sources of actual and forecast economic information.

Irrespective of the outcome of the above assessment, the credit risk on a loan is always presumed to have increased significantly since initial recognition if the contractual payments are more than 30 days past due, unless the bank has reasonable and supportable information that demonstrates otherwise.

By contrast, if a loan is assessed to have a low credit risk at the reporting date, then it is assumed that the credit risk on the loan has not increased significantly since initial recognition.

The bank regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increases in credit risk before the amount becomes past due.

Definition of default

For purposes of internal credit risk management purposes, the bank consider that a default event has occurred if there is either a breach of financial covenants by the counterparty, or if internal or external information indicates that the counterparty is unlikely to pay its creditors in full (without taking collateral into account).

Irrespective of the above analysis, the bank considers that default has occurred when a loan instalment is more than 90 days past due unless there is reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

Write off policy

The bank writes off a loan when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Loans written off may still be subject to enforcement activities under the bank recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default.

The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. The exposure at default is the gross carrying amount of the loan at the reporting date.

Lifetime ECL is measured on a collective basis in cases where evidence of significant increases in credit risk are not yet available at the individual instrument level. Loans are then grouped in such a manner that they share similar credit risk characteristics, such as nature of the loan, external credit ratings (if available), industry of counterparty etc.

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

Financial instruments (continued)

If the bank has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the bank measures the loss allowance at an amount equal to 12 month ECL at the current reporting date, and vice versa.

An impairment gain or loss is recognised for all loans in profit or loss with a corresponding adjustment to their carrying amount through a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance (note 21).

Credit risk

Details of credit risk related to loans receivable are included in the specific notes and the financial instruments and risk management (note 30).

Derecognition

Refer to the "derecognition" section of the accounting policy for the policies and processes related to derecognition.

Balances due to other banks, deposit due to customers

Classification

Balances due to other banks and Deposit due to customers are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

Balances due to other banks and deposits due to customers are recognised when the bank becomes a party to the contractual provisions of the instruments. These are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

Interest expense, calculated on the effective interest method, is included in profit or loss in interest and similar expenditure.

Financial liabilities expose the bank to liquidity risk and interest rate risk. Refer to note 30 for details of risk exposure and management thereof.

Financial liabilities denominated in foreign currencies

When financial liabilities are denominated in a foreign currency, the carrying amount of the loan is determined in the foreign currency. The carrying amount is then translated to the Pula equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (note 20).

Details of foreign currency risk exposure and the management thereof are provided in the specific loan notes and in the financial instruments and risk management (note 30).

Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

Financial instruments (continued)

Accruals and other payables

Classification

Accruals and other payables (note 16), excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Cash and cash equivalents

Cash and cash equivalents are stated at carrying amount which is deemed to be fair value. These are measured at amortised costs.

Derecognition

Financial assets

The bank derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the bank retains substantially all the risks and rewards of ownership of a transferred financial asset, the bank continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The bank derecognises financial liabilities when, and only when, the bank obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

1.5 Tax

Current tax assets and liabilities

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.5 Tax (continued)

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Leases

The bank assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the bank has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgement, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

Bank as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the bank is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the bank recognises the lease payments as an operating expense (note 21) on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

The various lease and non-lease components of contracts containing leases are accounted for separately, with consideration being allocated to each lease component on the basis of the relative stand-alone prices of the lease components and the aggregate stand-alone price of the non-lease components (where non-lease components exist).

However as an exception to the preceding paragraph, the bank has elected not to separate the non-lease components for leases of land and buildings.

Details of leasing arrangements where the bank is a lessee are presented in note 15 Leases (bank as lessee).

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the bank uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the bank under residual value guarantees;
- the exercise price of purchase options, if the bank is reasonably certain to exercise the option;
- lease payments in an optional renewal period if the bank is reasonably certain to exercise an extension option; and

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.6 Leases (continued)

- penalties for early termination of a lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability (or right-of-use asset). The related payments are recognised as an expense in the period incurred and are included in operating expenses (note 21).

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in Interest and similar expenditure (note 18).

The bank remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the bank will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Right-of-use assets are presented as a separate line item on the Statement of Financial Position and is initially measured at the present value of lease payments.

Lease payments included in the measurement of the right of use assets comprise the following:

- the initial amount of the corresponding lease liability;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, when the bank incurs an obligation to do so, unless these costs are incurred to produce inventories; and
- less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the bank expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are determined consistently with items of the same class of property, plant and equipment. Refer to the accounting policy for property, plant and equipment for details of useful lives.

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.6 Leases (continued)

When the Bank or lessor terminates or cancels a lease, the right of use asset and lease liability are derecognised. On derecognition, any difference is recognised as a gain or loss in the profit or loss.

1.7 Impairment of assets

The bank assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the bank estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the bank also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

1.8 Stated capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Ordinary shares are recognised at no par value and classified as 'stated capital' in equity.

1.9 Employee benefits

The bank's employees (other than employees seconded by the parent bank) are covered under a defined contribution pension plan to which the bank contributes. For employees seconded by the parent bank, the bank contributes to a provident fund managed by the parent bank.

Defined contribution plans

Payments to defined contribution retirement plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the bank's obligation under the schemes is equivalent to those arising in a defined contribution retirement plan.

1.10 Provisions and contingencies

Provisions are recognised when:

- the bank has a present obligation as a result of a past event;

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.10 Provisions and contingencies (continued)

- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are not recognised for future operating losses.

If an entity has a contract that is onerous, the present obligation under the contract shall be recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for terminating their services;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 27.

1.11 Recognition of Revenues and Expenses

The bank recognises revenue from the following major sources:

- Interest income on financial instruments including loans and advances
- Fee and commission income
- Treasury commission and foreign exchange gains/losses.

Revenues and expenses are recognised in the profit or loss for all interest-bearing instruments on an accrual basis using the effective interest rate. Interest income on securities includes revenues from fixed and floating interest rate coupons and accrued discount and premium, where significant and material. Fees and commissions are recognised in the profit or loss on an accrual basis. Fees and commissions related to the provision of loans are accrued over the contractual term of the loan until its due date and are recognised in the statement of comprehensive income in "Interest income". For financial assets categorised into Stage 3, the bank recognises interest income on the net financial asset after the recognition of expected credit loss.

Documentation and admin fees - This relates to fee and commission income related to the loans advances to customers. Revenue from commitment fees is recognised on a straight-line basis over the commitment period. The amounts to be recognised in future months are recognised as other liabilities.

Transaction based fees such as electronic banking fees are charged to the customer's account when the transaction takes place. Revenue related to transactions are recognised at the point in time when the transaction takes place.

Account servicing fees are charged on a monthly basis. The fees are recognised as the services are performed and received.

Other expenses and revenues are recognised in the relevant period on an accrual basis.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Accounting Policies

1.12 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Pula, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual financial statements are recognised in profit or loss in the period in which they arise.

When a gain or loss on a non-monetary item is recognised to other comprehensive income and accumulated in equity, any exchange component of that gain or loss is recognised to other comprehensive income and accumulated in equity. When a gain or loss on a non-monetary item is recognised in profit or loss, any exchange component of that gain or loss is recognised in profit or loss.

Cash flows arising from transactions in a foreign currency are recorded in Pula by applying to the foreign currency amount the exchange rate between the Pula and the foreign currency at the date of the cash flow.

1.13 Related parties

Parties are considered to be related to the Bank if meet the following definitions;

(a) A person or a close member of that person's family:

- has control or joint control over the Bank;
- has significant influence over the Bank; or
- is a member of the key management personnel of the Bank.

(b) An entity for which the following conditions apply:

- the entity and the Bank are members of the same group
- the entity is controlled or jointly controlled by a person identified in (a)
- the entity, or any member of a group of which it is a part, provides key management personnel services to the Bank.

A number of transactions are entered into with related parties in the normal course of business. These transactions are summarised in the notes to the financial statements.

1.14 Earnings per share

Basic earnings per share is calculated by dividing the net profit after tax attributable to the shareholders by the weighted average number of equity shares outstanding during the year adjusted for bonus element in equity share, attributable to the shareholders. Diluted earnings per share adjusts the figures used in determination of basic earnings per share to take into account the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as at the beginning of the period unless issued at a later date.

Notes to the Annual Financial Statements

2. Changes in accounting policy

The annual financial statements have been prepared in accordance with International Financial Reporting Standards on a basis consistent with the prior year except for the adoption of the following new or revised standards. These are given in Note 3.

3. New Standards and Interpretations

3.1 Standards and interpretations effective and adopted in the current year

In the current year, the bank has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

Annual Improvement to IFRS Standards 2018-2020: Amendments to IFRS 1

A subsidiary that uses the cumulative translation differences exemption, may elect in its financial statements, to measure cumulative translation differences for all foreign operations at the carrying amount that would be included in the parent's consolidated financial statements, based on the parent's date of transition to IFRS if no adjustments were made for consolidation procedures and for the effects of the business combination in which the parent acquired the subsidiary.

The effective date of the bank is for years beginning on or after 01 January 2022.

The bank has adopted the amendment for the first time in the 2023 annual financial statements.

The impact of the amendment is not material.

Reference to the Conceptual Framework: Amendments to IFRS 3

The amendment makes reference to the Conceptual Framework for Financial Reporting issued in 2018 rather than to the IASC's Framework for the Preparation and Presentation of Financial Statements. The amendment specifically points to the treatment of liabilities and contingent liabilities acquired as part of a business combination, and which are in the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets or IFRIC 21 Levies. It clarifies that the requirements of IAS 37 or IFRIC 21 should be applied to provisions, contingent liabilities or levies to determine if a present obligation exists at the Acquisition date. The amendment further clarifies that contingent assets of acquirees share not be recognised as part of the business combination.

The effective date of the bank is for years beginning on or after 01 January 2022.

The bank has adopted the amendment for the first time in the 2023 annual financial statements.

The impact of the amendment is not material.

Annual Improvement to IFRS Standards 2018-2020: Amendments to IFRS 9

The amendment concerns fees in the '10 per cent' test for derecognition of financial liabilities. Accordingly, in determining the relevant fees, only fees paid or received between the borrower and the lender are to be included.

The effective date of the bank is for years beginning on or after 01 January 2022.

The bank has adopted the amendment for the first time in the 2023 annual financial statements.

The impact of the amendment is not material.

3.2 Standards and interpretations not yet effective

The bank has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the bank's accounting periods beginning on or after 01 April 2023 or later periods:

Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

3. New Standards and Interpretations (continued)

If a parent loses control of a subsidiary which does not contain a business, as a result of a transaction with an associate or joint venture, then the gain or loss on the loss of control is recognised in the parents' profit or loss only to the extent of the unrelated investors' interest in the associate or joint venture. The remaining gain or loss is eliminated against the carrying amount of the investment in the associate or joint venture. The same treatment is followed for the measurement to fair value of any remaining investment which is itself an associate or joint venture. If the remaining investment is accounted for in terms of IFRS 9, then the measurement to fair value of that interest is recognised in full in the parents' profit or loss.

The effective date of the amendment is to be determined by the IASB.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

Lease liability in a sale and leaseback

The amendment requires that a seller-lessee in a sale and leaseback transaction, shall determine 'lease payments' or 'revised lease payments' in a way that the seller-lessee would not recognise any amount of the gain or loss that relates to the right of use retained by the seller-lessee.

The effective date of the amendment is for years beginning on or after 01 January 2024.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

Deferred tax related to assets and liabilities arising from a single transaction - Amendments to IAS 12

The amendment adds an additional requirement for transactions which will not give rise to the recognition of a deferred tax asset or liability on initial recognition. Previously, deferred tax would not be recognised on the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction affects neither accounting profit or loss. The additional requirement provides that the transaction, at the time of the transaction must not give rise to equal taxable and deductible temporary differences.

The effective date of the amendment is for years beginning on or after 01 January 2023.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

Disclosure of accounting policies: Amendments to IAS 1 and IFRS Practice Statement 2.

IAS 1 was amended to require that only material accounting policy information shall be disclosed in the annual financial statements. The amendment will not result in changes to measurement or recognition of financial statement items, but management will undergo a review of accounting policies to ensure that only material accounting policy information is disclosed.

The effective date of the amendment is for years beginning on or after 01 January 2023.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

Definition of accounting estimates: Amendments to IAS 8

The definition of accounting estimates was amended so that accounting estimates are now defined as "monetary amounts in annual financial statements that are subject to measurement uncertainty."

The effective date of the amendment is for years beginning on or after 01 January 2023.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

Classification of Liabilities as Current or Non-Current - Amendment to IAS 1

The amendment changes the requirements to classify a liability as current or non-current. If an entity has the right at the end of the reporting period, to defer settlement of a liability for at least twelve months after the reporting period, then the liability is classified as non-current.

If this right is subject to conditions imposed on the entity, then the right only exists, if, at the end of the reporting period, the entity has complied with those conditions.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

3. New Standards and Interpretations (continued)

In addition, the classification is not affected by the likelihood that the entity will exercise its right to defer settlement. Therefore, if the right exists, the liability is classified as non-current even if management intends or expects to settle the liability within twelve months of the reporting period. Additional disclosures would be required in such circumstances.

The effective date of the amendment is for years beginning on or after 01 January 2023.

It is unlikely that the amendment will have a material impact on the bank's annual financial statements.

2022

5. Balances with banks (continued)

Balances with banks are subject to the impairment provisions of IFRS 9 Financial Instruments, which requires a loss allowance to be recognised for all exposures to credit risk. The loss allowance for balances with banks is calculated based on twelve month expected losses if the credit risk has not increased significantly since initial recognition. In cases where the credit risk has increased significantly since initial recognition, the loss allowance is calculated based on lifetime expected credit losses. The loss allowance is updated to either twelve month or lifetime expected credit losses at each reporting date based on changes in the credit risk since initial recognition. If a loan is considered to have a low credit risk at the reporting date, then it is assumed that the credit risk has not increased significantly since initial recognition. On the other hand, if a loan is in arrears more than 90 days, then it is assumed that there has been a significant increase in credit risk since initial recognition.

In determining the amount of expected credit losses, the bank has taken into account any historic default experience, the financial positions of the shareholders as well as the future prospects in the industries in which the shareholders operate.

There has been no change in the estimation techniques or significant assumptions made during the current reporting period.

The maximum exposure to credit risk is the gross carrying amount as presented below. The bank does not hold collateral or other credit enhancements against balances with banks.

Credit rating framework

For purposes of determining the credit loss allowances, management determine the credit rating grades of each loan at the end of the reporting period. These ratings are determined either externally through ratings agencies or internally where external ratings are not available.

The table below sets out the internal credit rating framework which is applied by management for loans for which external ratings are not available. The abbreviation "ECL" is used to depict "expected credit losses."

Internal credit grade	Description	Basis for recognising expected credit losses
Performing - Stage 1	Low risk of default and no amounts are past due	12 Month ECL
Doubtful - Stage 2	Either 30 days past due or there has been a significant increase in credit risk since initial recognition.	Lifetime ECL (not credit impaired)
In default - Stage 3	Either 90 days past due or there is evidence that the asset is credit impaired	Lifetime ECL (credit impaired)
Write-off	There is evidence indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery.	Amount is written off

Credit rating framework

For purposes of determining the credit loss allowances, management determine the credit rating grades of each loan at the end of the reporting period. These ratings are determined either externally through ratings agencies or internally where external ratings are not available.

The table below sets out the internal credit rating framework which is applied by management for loans for which external ratings are not available. The abbreviation "ECL" is used to depict "expected credit losses."

Internal credit grade	Description	Basis for recognising expected credit losses
Performing - Stage 1	Low risk of default and no amounts are past due	12m ECL
Doubtful - Stage 2	Either 30 days past due or there has been a significant increase in credit risk since initial recognition.	Lifetime ECL (not credit impaired)
In default - Stage 3	Either 90 days past due or there is evidence that the asset is credit impaired	Lifetime ECL (credit impaired)
Write-off	There is evidence indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery.	Amount is written off

Exposure to credit risk

Loans and advances inherently expose the bank to credit risk, being the risk that the bank will incur financial loss if customers fail to make payments as they fall due.

In order to mitigate the risk of financial loss from defaults, the bank only deals with reputable customers with consistent payment histories. Sufficient collateral or guarantees are also obtained when appropriate. Each customer is analysed individually for creditworthiness before terms and conditions are offered. Statistical credit scoring models are used to analyse customers. These models make use of information submitted by the customers as well as external bureau data (where available). Customer credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of customers, is continuously monitored.

There have been no significant changes in the credit risk management policies and processes since the prior reporting period.

IFRS 9 ECL measurements under General Approach

Bank of Baroda (Botswana) Limited

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

Figures in Pula thousand

2023

2022

7. Loans and advances (continued)

The objective of the impairment requirements is to recognize lifetime expected credit losses for financial instruments for which there has been a significant increase in credit risk since initial recognition – whether assessed on an individual or collective basis – considering all reasonable and supportable information, including that which is forward-looking.

If, at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the bank will measure the credit losses for the financial instrument at an amount equal to 12-month expected credit losses.

The general approach has two bases on which to measure expected credit losses expected, which are defined as the weighted average of credit losses with the respective risks of default occurring as the weights. The two bases as provided by IFRS 9 are defined as:

- 12-month (**Stage 1**) expected credit losses are the portion of the lifetime expected credit losses that represent the expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date; and
- Lifetime (**Stages 2 & 3**) expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

Whether expected credit losses are based on 12-month expected credit losses or lifetime expected credit losses will depend on whether there has been a significant increase in credit risk since initial recognition. The bank makes an assessment of whether credit risk has increased significantly is made at each reporting date. When making this assessment, the bank uses the change in the risk of a default occurring over the expected life of the financial instrument.

Expected Credit Loss (ECL)

Expected credit losses are defined by IFRS 9 as the weighted average of credit losses with the respective risks of default occurring as the weights.

The bank determines its credit loss as the difference between all discounted contractual cash flows that are due to it in accordance with the contract and all the discounted cash flows that the bank expects to receive.

ECLs are an estimate of credit losses over the life of a financial instrument and when measuring ECLs, an entity needs to take into account:

- The probability-weighted outcome
- The time value of money so that ECLs are discounted to the reporting date
- Reasonable and supportable information that is available without undue cost or effort

12-month expected credit loss

On initial recognition of each exposure, the bank assesses the credit risk of the asset and calculates 12-months expected credit loss. Subsequent to initial recognition the bank reviews the changes in expected credit losses since initial recognition based on the documented benchmark and it determines if the increase in credit risk is significant.

Where the increase is perceived **NOT** to be significant, the bank recognizes 12-month expected credit loss.

For assets with a maturity of 12 months or less, the bank takes the 12-month expected loss allowance as being equal to the lifetime expected loss allowance.

Therefore, monitoring whether there has been a significant increase in credit risk since initial recognition is not relevant for the purpose of measuring the loss allowance. Thus, for loans with a maturity of 12 months or less, the measurement of lifetime expected credit losses will be equal to the measurement of 12-month expected credit losses.

A loss allowance is recognised for all loans and advances to customers, in accordance with IFRS 9 Financial Instruments, and is monitored at the end of each reporting period. In addition to the loss allowance, loans and advances to customers are written off when there is no reasonable expectation of recovery, for example, when a debtor has been placed under liquidation. Loans and advances to customers which have been written off are not subject to enforcement activities.

Capital risk management

The Bank's objective when maintaining capital, is to comply with the requirements set by the regulators of the banking markets where the Bank operates, to safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits to other stakeholders and to maintain a strong capital base to support the development of its business

Regulatory compliance

Capital adequacy and the use of regulatory capital are monitored by the Bank, applying techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervision (Basel Committee) and European Community Directives, as implemented by the Bank of Botswana for supervisory purposes.

These techniques include the risk weighted asset ratio, which the Bank of Botswana regards as a key supervisory tool. The Bank of Botswana has set the individual minimum ratio requirements for Banks in Botswana at 12.5% which is above the Basel Committee minimum guideline of 8%. The ratio calculation involves the application of designated risk weightings to reflect an estimate of credit, operational, market and other risks associated with broad categories of transactions and counterparties.

Regulatory guidelines define two tiers of capital resources: Tier 1 (core) capital, comprising mainly shareholders' funds, is the highest tier. Tier 2 capital includes perpetual, medium and long term subordinated debt, general provisions for bad and doubtful debts as well as property and equipment revaluation reserves. Both tiers can be used to meet trading and banking activity requirements although tier 2 capital, included in the risk asset ratio calculation, may not exceed tier 1 capital.

The Bank has complied with all externally imposed capital requirements throughout the period

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

30. Financial instruments and risk management (continued)

Financial risk management

Overview

The bank is exposed to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk (currency risk and interest rate risk).

Credit risk

Credit risk is the risk of financial loss to the bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. It is the risk that the Bank's customers, clients or counterparties will not be able or willing to pay interest, repay capital or otherwise fail to fulfil their contractual obligations under loan agreements or other credit facilities. Credit risk also arises through the downgrading of counterparties whose credit instruments the Bank may be holding, causing the value of those assets to fall. Furthermore, credit risk is manifested as sector risk where difficulties experienced by the sector in which the exposure is domiciled may impede payment or reduce the value of the asset. Settlement risk is another special form of credit risk which is the possibility that the Bank may pay a counterparty – for example, a Bank in a foreign exchange transaction – and fail to receive the corresponding settlement in return

Credit risk is the Bank's largest risk and considerable resources, expertise and controls are devoted to managing it.

The bank is exposed to credit risk on financial assets - investments, loans and advances, cash and cash equivalents, loan commitments and financial guarantees.

Credit risk for exposures other than those arising on cash and cash equivalents, are managed by making use of credit approvals, limits and monitoring. The bank only deals with reputable counterparties with consistent payment histories. Sufficient collateral or guarantees are also obtained when necessary. Each counterparty is analysed individually for creditworthiness before terms and conditions are offered. The analysis involves making use of information submitted by the counterparties as well as external bureau data (where available). Counterparty credit limits are in place and are reviewed and approved by credit management committees. The exposure to credit risk and the creditworthiness of counterparties is continuously monitored.

Credit risk exposure arising on cash and cash equivalents is managed by the bank through dealing with well-established financial institutions with high credit ratings.

Credit loss allowances for expected credit losses are recognised for all debt instruments, but excluding those measured at fair value through profit or loss. Credit loss allowances are also recognised for loan commitments and financial guarantee contracts.

In order to calculate credit loss allowances, management determine whether the loss allowances should be calculated on a 12 month or on a lifetime expected credit loss basis. This determination depends on whether there has been a significant increase in the credit risk since initial recognition. If there has been a significant increase in credit risk, then the loss allowance is calculated based on lifetime expected credit losses. If not, then the loss allowance is based on 12 month expected credit losses. This determination is made at the end of each financial period. Thus the basis of the loss allowance for a specific financial asset could change year on year.

Management apply the principle that if a financial asset's credit risk is low at year end, then, by implication, the credit risk has not increased significantly since initial recognition. In all such cases, the loss allowance is based on 12 month expected credit losses. Credit risk is assessed as low if there is a low risk of default (where default is defined as occurring when amounts are 90 days past due). When determining the risk of default, management consider information such as payment history to date, industry in which the customer belongs, period for which the customer has been active, external credit references etc. In any event, if amounts are 30 days past due, then the credit risk is assumed to have increased significantly since initial recognition. Credit risk is not assessed to be low simply because of the value of collateral associated with a financial instrument. If the instrument would not have a low credit risk in the absence of collateral, then the credit risk is not considered low when taking the collateral into account.

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

30. Financial instruments and risk management (continued)

Credit rating assessment at the time of sanction and review

The Bank uses an internally developed credit rating system for exposure limits to business and commercial loans in excess of P 200 000 . The rating system takes into account the financial discipline of the borrower and is based on the latest financial statements availed to the Bank. Ratings of the most credit-worthy customer are assigned at AAA and decrement points system is used. Ratings below BBB are not considered by the Bank as viable option. Loans to individuals are not rated.

At the reporting date, exposures to customers categorised into ratings are as follows

	2023	2022
AAA	1 060 306	948 265
AA	529 339	514 690
A	55 048	31 580
B and BBB	6 176	8 460
Unrated and NPA	211 202	137 706
	1 862 071	1 640 701

The maximum exposure to credit risk is presented in the table below:

Sensitivity of ECL to future economic conditions

The ECL are sensitive to judgements and assumptions made regarding formulation of forward looking scenarios and how such scenarios are incorporated into the calculations. Management performs a sensitivity analysis on the ECL recognised on material classes of its assets. The management uses inflation, GDP information, unemployment and other macro factors for calculations of the ECL. The management estimates that the credit loss would increase by P 5 million should there be any change by more than 10% in the underlying factors and resultantly would decrease the profit after tax and the equity by the same amount.

Collateral and other credit enhancements obtained

The following table analyses the collateral and other credit enhancements before impairments

Collateral classified as follows

Secured by cash	227 623	104 753
Secured by mortgage on properties and hypothecation of assets	1 578 118	1 488 236
Unsecured	56 330	47 712
	1 862 071	1 640 701

Concentration risk

The bank had a significant concentration risk resulting from its top ten customers. The total exposure relating to these customers was P('000) 376 981 (2022: P461 419), comprising 20.9% (2022:28%) of the gross loan book at the reporting date.

Liquidity risk

The liquidity risk is the risk of being unable to meet financial or settlement obligation to customers or counterparties.

The Bank's Asset-Liabilities Committees (ALCO) is charged to ensure access to funds and to avoid a concentration of funding needs at any one time or from any one source. Meetings are held every quarter and also when there are changes to Bank of Botswana rate.

ALCO also controls asset maturities as well as the volume and quality of holdings of liquid assets and short term funds. In evaluating the Bank's liquidity position, ALCO takes account of lending commitments not drawn, the use of overdraft facilities and the possible impact of outstanding contingent liabilities, such as letters of credit and guarantees.

The matching and controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to the business of the Bank. It is unusual for Banks to be completely matched, as transacted business is often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature are important factors in assessing the liquidity of the Bank and its exposure to changes in interest rates.

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

30. Financial instruments and risk management (continued)

The Bank's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Bank's reputation.

Primary reserve held is 2.5% (2022:2.5%) of net local currency deposits and liquid asset ratio is 10% of net local currency deposits.

Bank of Baroda (Botswana) Limited

Foreign currency risk		
<p>The bank is exposed to foreign currency risk as a result of certain transactions and borrowings which are denominated in foreign currencies. Exchange rate exposures are managed within approved policy parameters utilising foreign forward exchange contracts where necessary. The foreign currencies in which the bank deals primarily are US Dollars, Euros, GBP, ZAR and INR.</p> <p>The bank through treasury, manages foreign currency risk in accordance with broad risk guidelines set by the Board. Foreign currency risk arises as a result of fluctuations in exchange rates and the resultant impact on the Bank's position, which is established during normal day to day trading. During the financial year under review, the Bank's authorised Net open position exposure limit was USD 1 000 000 (2022 :USD 1 000 000). The limits were adhered to throughout the year and at year end. Even though treasury may take position on any major currencies, for the purposes of exposure limit, these are calculated in USD after considering the forward and spot contracts.</p> <p>There have been no significant changes in the foreign currency risk management policies and processes since the prior reporting period.</p>		
Exposure in Pula		
<p>The net carrying amounts, in Pula, of the various exposures, are denominated in the following currencies. The amounts have been presented in Pula by converting the foreign currency amounts at the closing rate at the reporting date: (Amounts in 000)</p>		
US Dollar exposure:

Foreign currency sensitivity analysis

The following information presents the sensitivity of the bank to an increase or decrease in the respective currencies it is exposed to. The sensitivity rate is the rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated amounts and adjusts their translation at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period.

Interest rate risk

The bank has an active ALCO whose responsibility is for balance sheet planning from risk returns perspective, particularly strategic management of interest rate risk. There is an interest rate risk management policy that gives guidance on the management of the following: 1. Gap or Mismatch risk 2. Basis risk 3. Embedded Option risk 4. Yield Curve risk 5. Price risk 6. Reinvestment risk

Gap or Mismatch Risk Gap or mismatch risk arises from differences in maturity dates, repricing dates and principal amounts of assets and liabilities. On account of the mismatch, interest rate change can alter the income and economic value.

Basis Risk Even in a perfectly matched gap position, there is a risk that the interest rates of different instruments on different basis viz. BOBCs yield or US\$ LIBOR etc. will not change by the same degree during a given period of time. Basis risk arises from the possibility that the interest rates of different assets and liabilities, which have different basis, change in different magnitudes.

Embedded Option Risk: Changes in the level of interest rates can cause prepayment of loans and the exercise of put/call options on bonds and withdrawal of deposits before their stated maturity dates. If not adequately managed, instruments with optionality features can pose significant risk as options are generally exercised to the advantage of the holder of the option.

Yield Curve Risk: The yield on various assets does not change equally with change in interest rate due to differing maturities. The unequal change in yield of different assets for different maturities for a specific change in interest rate gives rise to yield curve risks. The Bank's endeavour will be to take a view of possible movement of interest rate change over a period of twelve months, since major part of assets are by way of Overdraft facility for twelve months and Loan facility extending beyond twelve months.

Price Risk: When assets are sold at a price lower than cost price a price risk occurs. However, the Bank's policy is to manage our liabilities in such a way that it will not be in a situation where securities will be sold at a price lower than purchase price.

Reinvestment Risk: This risk arises from the uncertainty regarding the interest rate at which future cash flow can be reinvested. Thus the interest rate risk of the financial institution has to be seen not from the traditional earnings perspective only, but more importantly, from the economic value perspective also as variation in interest rates can affect the economic value of its assets, liabilities and off balance sheet positions. The sensitivity of economic value to fluctuations in interest rates is of considerable importance to all the stakeholders and the supervisors.

Interest rate profile

The interest rate profile of interest bearing financial instruments at the end of the reporting period was as follows:

At 31 March 2023	Under-3 months	3 to 12 months	1-5 years	Over 5 years	Non - interest bearing	Non-financial	Total

Interest rate sensitivity analysis

The following sensitivity analysis has been prepared using a sensitivity rate which is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. All other variables remain constant. The sensitivity analysis includes only financial instruments exposed to interest rate risk which were recognised at the reporting date. No changes were made to the methods and assumptions used in the preparation of the sensitivity analysis compared to the previous reporting period. These calculations are based on simplified scenarios. Based on the simulations performed, the impact on pre-tax profit of a .5% shift in interest rates would result in the following. Operational risk

The Bank's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Bank's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity. The primary responsibility for the development and implementation of controls to address operational risk is assigned to senior management. This responsibility is supported by the holding Bank standards for the management of operational risk in the following areas:

- requirements for appropriate segregation of duties, including the independent authorisation of transactions;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified;
- requirements for the reporting of operational losses and proposed remedial action;
- development of contingency plans;
- training and professional development;
- ethical and business standards; and
- risk mitigation, including insurance where this is effective.

Compliance with the parent Bank's and the Bank of Botswana's requirements are supported by a periodic review undertaken by the senior management of the Bank. Spot rectifications are, where ever possible, carried out.

Bank of Baroda (Botswana) Limited

(Registration number BW00000570268)

Annual Financial Statements for the year ended 31 March 2023

Notes to the Annual Financial Statements

31. Fair value information

Fair value hierarchy

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observable significant inputs to the measurement, as follows:

Level 1: Quoted unadjusted prices in active markets for identical assets or liabilities that the Bank can access at measurement date.

Level 2: Inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

All financial assets and liabilities are categorised under Level 2 for the purposes of disclosure.

For loans and advances to customers which are in the nature of overdrafts and short term loans, the estimated fair value approximates to the carrying value. For deposits due to customers with no stated maturity value which includes non-interest bearing deposits, the fair value is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

Due to the nature of the instruments, the carrying values of all financial assets and liabilities approximately equates to their fair values.

32. Events after the reporting period

There are no events subsequent to the reporting period that require either an adjustment or disclosure in these financial statements.
