Macro developments

- Total GST collections for Aug'19 fell to Rs 919bn (-2.7%) vs Rs 982bn in Jul'19 (+4.5%). Major decline was seen in IGST collections (-) Rs 461bn in Aug'19 vs Rs 253bn in Jul'19. However, both CGST (+90.2%) and SGST (7.3%) collections remained robust. The FYTD average run-rate of CGST is running at Rs 419bn, higher than Rs 370bn last year. SGST collections are also higher at Rs 243bn compared with RS 216bn last year.
- US ISM manufacturing index plunged to a 10-year low at 47.8 in Sep'19 vs 49.1 in Aug'19. The decline was broad based as production, employment and inventories all fell as US-China trade war continues to linger on. Manufacturing activity in the Eurozone also slowed further as the Markit Eurozone PMI went deeper in the contraction zone at 45.7 vs 47 in Aug'19. The data raised fresh concerns over a global growth slowdown.
- Reserve Bank of Australia has reduced the interest rates for the 3rd time in a row by 0.25% to 0.75% to boost growth. RBA also hinted that it may continue with further monetary easing to support employment and move inflation towards the 2-3% target range. It also noted that risks to global growth remain on the back of US-China trade dispute.
