

## MACRO DAILY

11 May 2021

### Macro developments

- India's unemployment rate continued to shoot up and rose to 8.19% (30-day moving average) as on 10 May 2021 versus 7.91% in the previous week. This was the highest rate since Jan'21. Both rural and urban unemployment rate inched up to 7.11% and 10.52% respectively from 7.07% and 9.69%. This number may deteriorate further due to rising Covid-19 cases and reverse migration in few States (Karnataka, Delhi, Kerala).
- Australia's retail sales rebounded and rose by 1.3% in Mar'21 compared with a contraction of 0.8% in Feb'21 on a MoM basis. This was driven by record sales at cafes and restaurants (4.8%) followed by sales in departmental stores (8.5%) and clothing & footwear industry (5.4%). Separately, National Australia Bank's business confidence index also touched a record high of 26 in Apr'21 from 15 in Mar'21, signalling strong recovery.
- China's PPI rose by 6.8% in Apr'21 (est. 6.5%) from 4.4% in Mar'21, registering the sharpest increase since Oct'17. The rise was attributed to a lower base as well as higher commodity prices, particularly for iron ore and non-ferrous metals. CPI inflation also rose to a 9-month high of 0.9% in Apr'21 (est. 1%) from 0.4% in Mar'21.
