

## MACRO DAILY

12 March 2021

### Macro developments

- India's fuel consumption fell for the 2<sup>nd</sup> straight month in Feb'21 to its lowest since Sep'20 by 4.6% (MoM basis) to 17.2mn tonnes. Even diesel consumption fell by 3.8% (MoM basis) to 6.6mn tonnes. This was on the back of higher petrol and diesel prices which rose to their highest at Rs 91.3/ltr and Rs 83/ltr respectively in Feb'21.
- US jobless claims for the week ended 6 Mar 2021 fell by 42,000 to 712,000, a 4-month low, as against estimate of 725,000. This was on the back of a decline in Covid-19 cases and increased vaccination which allowed more businesses to open. The 4-week moving average also dipped by 34,000 to 759,000 suggesting a steady recovery in labour market.
- ECB in its policy meet kept the rates on hold at historically low levels. Further, in order to accelerate credit flow and encourage investment as well as spending, ECB will increase its bond purchasing program in the next quarter. This is based on its assessment of financing conditions and inflation outlook. This move in turn is expected to keep the borrowing costs lower. It also warned of contraction in Q1CY21 and continuing uncertainty in the near future
