Macro developments

- In an effort to protect the interest of investors and depositors, RBI has issued several directions for Housing Finance Companies (HFCs). These pertain to maintenance of liquidity coverage ratio, risk management, asset classification and LTV ratio, amongst others. It has also prevented HFCs to accept/renew public deposit unless it obtained a minimum investment grade rating for fixed deposits from any approved CRAs for at least a year.
- US Fed minutes pointed out that considerable risks to economic outlook remain. Thus, the current ultra-low policy rate and asset purchase program (US\$ 120bn/month) are likely to persist till FOMC goals are achieved. Separately, US retail sales rose to a 7-month high of 5.3% in Jan'21 on MoM basis (est.: 1%) versus 1% dip in Dec'20. Industrial production rose by 0.9% in Jan'21 (est.: 0.4%) from 1.3%, led by mining and manufacturing.
- UK's CPI rose by 0.9% in Jan'21 (highest since Oct'20) following 0.8% increase in Dec'20. The pickup was led by higher contribution from furniture and household items, restaurants and hotels and transport. With rising commodity prices, and increased costs owing to Brexit, it is expected that inflation will meet or even surpass BoE's 2% inflation target in CY21.
