18 March 2021

### Macro developments

- As per CMIE data, unemployment rate (30-day moving average) in India rose slightly to 6.53% as on 17 Mar 2021 from 6.52% in the previous week. This was led by urban unemployment which rose to 7.14% from 7.05% in the previous week. However, rural unemployment edged down to 6.25% from 6.28% in the previous week.
- US Fed kept policy rate unchanged. However, it revised its growth estimates upwards to 6.5% in CY21 from 4.2% earlier. Inflation projection has also been revised upward to 2.4% from 1.8%. The dot plot suggests 4 of the 18 FOMC members expect a rate hike in CY22, against just one member in the previous meeting. In a separate print, housing starts fell by 10.3% to 1.42mn units in Feb'21 (lowest since Aug'20).
- Unemployment rate in Australia fell to 5.8% in Feb'21 (est.: 6.3%) from 6.3% in Jan'21. Employment rose to 88,700 in Feb'21 versus estimate of an increase of 30,000 and 29,000 increase in Jan'21. The stronger than expected rebound in labour market reinforces views of a V-shaped recovery. However, the end of the JobKeeper program in Mar'21 may impinge on labour market recovery.
