Macro developments

- RBI sold net US\$ 5.7bn in the spot market in Mar'21 compared with net sale of US\$ 1.2bn. In FY21, RBI bought US\$ 68.3bn in the spot market versus US\$ 45.1bn in the same period last year. In the forwards market, RBI sold US\$ 0.4bn versus net purchase of US\$ 25.8bn in Feb'21. RBI's outstanding forward position stands at US\$ 72.8bn.
- Japan's GDP growth fell by 1.3% on QoQ basis in Q1CY21 versus est.: 1.2% decline and 2.8% increase in Q4CY20. The slowdown was owing to second state emergency implemented between Jan-Mar'21 and decline in government spending (1.6% decline versus 1.6% increase in Q4). Personal consumption fell by 1.4% in Q1 following 2.2% increase in Q4CY20. With reimposition of lockdown since 25 Apr 2021, analysts expect another contraction in Q2 versus 0.5% increase in growth projected earlier.
- RBA in its minutes revealed the Board remained committed to support the economy and not raise the cash rate till the actual inflation is 'within the sustainable target range of 2-3%'. This has to be supported by higher wage growth and would also require improvement in employment. The Board expects these conditions are unlikely to change by CY24.
