- As per CMIE data, unemployment rate in India declined to 8.4% for the week ended 18 Apr 2021 from 8.6% in the previous week. However, urban unemployment rate rose sharply to 10.7% from 9.8% last week, amidst a sharp surge in Covid-19 cases prompting several state governments to enforce restrictions. Rural unemployment rate on the other hand, eased further to 7.3% from 8% last week, after increasing in Mar'21.
- Japan's exports rose to a 40-month high of 16.1% in Mar'21 (est. 11.7%) versus a decline of 4.5% in Feb'21. Exports of autos, semiconductors and chip-making equipment rose. Further, while exports to China rose sharply by 37.2% (lifetime high), exports to US were relatively muted at 4.9%. Imports rose by 5.7% in Mar'21. Separately, industrial production fell by 2% in Feb'21 on a YoY basis versus a decline of 2.6% in Jan'21.
- RBA minutes highlighted that the central bank is in no hurry to tighten policy settings. It reiterated that it will maintain its supportive policy until inflation is within 2-3% target range. While it expects that the economy will expand at 'above trend' pace this year and the next, wage and price pressures remain subdued along with higher unemployment rate.
