Macro developments

- To address the current economic slowdown, government has reduced the effective corporate tax rate to 25.2% from 29.5% currently. MAT has also been reduced from 18.5% to 15%. The measure will benefit smaller firms and services sector the most. Fresh investments will be taxed at 17% thus leading to a much improved RoE. The aggregate impact of these measures will result in Rs 1.45tn reduction in tax revenue (0.7% of GDP).
- Japan's CPI eased on a YoY basis in Aug'19 to 0.2% from 0.6% in Jul'19. Core CPI moderated to 0.5% in Aug'19 vs 0.6% in Jul'19. The dip in prices was mainly driven by medical care (-0.2% vs 0.6%) and transportation & communication (-1.2%). With dip in inflation & faltering domestic growth, BoJ is expected to announce monetary easing in its Oct'19 meeting.
- Consumer confidence improved slightly in both Euro area & EU by 0.6 points in Aug'19. It was at (-) 6.5 in the Euro area and at (-) 6.4 points in the EU, well above their long period average. Improvement in consumer confidence is a respite amidst muted growth in the region. Further, ECB's current monetary easing measures will support demand in the near term.
