In a separate print, IFO index edged down to 90.7 from 92.5 in Oct'20, due to rising Covid-19 cases and stringent restrictions impacting the services industry the most.

The sub-index for present situation eased to 105.9 from 106.2, while the expectation index (short-term outlook on income and labour market) fell much more sharply to 89.5 from 98.2 in Oct'20. Delay in new fiscal stimulus and resurgence in Covid-19 cases impacted the mood.
