Macro developments

- IMF has projected India's growth to rebound to 11.5% in FY22 from a decline of 8% in FY21, to be the fastest growing country in the world. Growth forecasts for FY21 and FY22 were revised upwards by 2.3% and 2.7% respectively, led by a revival in economic activity as lockdown restrictions were eased. Global growth is also expected to recover from 3.5% dip in CY20 to 5.5% in CY21 on the back of strong policy support and vaccine rollout.
- China's industrial profits rose by 20.1% in Dec'20 from 15.5% Nov'20. In CY20 profits have risen by 4.1% following 3.3% decline in CY19. After complete lockdown in Q1CY20, production recovered to meet pandemic related global demand. Profits of manufacturing sector rose by 7.6% and that of overall private sector rose by 3.1%. Earnings of SoEs fell by 2.9%.
- US Conference Board consumer confidence index rose to 89.3 in Jan'21 from 87.1 in Dec'20. This was led by rise in the short-term outlook index for income and labour market from 87 to 92.5. The current situation index however deteriorated further to 84.4 from 87.2 in Dec'20, as consumers expect job losses in the wake of raging Covid-19 cases.
