28 May 2020

### Macro developments

- RBI reported that currency in circulation (CIC) increased by Rs 221bn and stood at Rs 26.1tn for the week ending 22 May 2020. Reserve money rose by 12.8% on a YoY basis, compared with 12.4% a year ago. On a FYTD basis, reserve money increased by 3% as against decline of 0.1% last year.
- RBA Governor has said that negative rates and more quantitative easing are unlikely. This is because the economic impact COVID-19 is likely to be lower than expected as the pandemic has been contained (7,150 confirmed cases), allowing for a quick resumption in economic activity. However, rates are expected to remain at a historic low at 0.25% on the back of muted inflation and higher unemployment.
- China's industrial profits fell by 4.3% in Apr'20 compared with 34.9% decline in Mar'20. Post reopening of the economy, industries contributing positively were: automobiles, special purpose equipment, electrical machinery and electronics industry. On CYTD20 basis, profits were down by 27.4%. Profits of SoEs have fallen by 46% and private firms by 17.2%.
