Macro developments

- As per news reports, CPSEs have been tasked by the FM to ensure that 50% of their budgeted capital outlay (Rs 1.66tn) is spent by Q2FY21. As of Q1FY21, spending is at Rs 202bn (12.2% of the target) versus Rs 263.2bn (16% of the target) in Q1FY20. However, labour shortage and delayed imports have been cited as key hurdles currently.
- Industrial production in Germany rose by 7.8% in May'20 on a MoM basis versus a decline of 17.5% in Apr'20. The rebound was led by capital goods production (up by 27.6%) amidst easing lockdown restrictions. Separately, Ifo production index rose to 4.3 in Jun'20 from (-) 19.5 in May'20 signalling that the economy is recovering. However, government expects GDP growth to contract by 6.3% in CY20 - its lowest since WWII.
- Reserve Bank of Australia (RBA) decided to keep its policy rate unchanged at 0.25%. However, it highlighted that unprecedented monetary policy easing coupled with fiscal response is needed to emerge from the ongoing crisis. It also pointed that some green shoots of recovery are visible despite ongoing uncertainty about the health situation globally.
