### Macro developments

- RBI reported that currency in circulation (CIC) declined by Rs 37.3bn and stood at Rs 28.5tn for the week ending 2 Apr 2021. Reserve money rose by 18.2% on a YoY basis, compared with 9.3% a year ago. On FYTD basis, reserve money increased by 0.7% as against a decline of 1.9% a year ago.
- India's services PMI eased to 54.6 in Mar'21 from 55.3 in Feb'21 as rising Covid-19 cases impacted services activity. However the index remained in the expansion zone for the 6<sup>th</sup> consecutive month. New orders rose, albeit at a slower pace. However, new orders from abroad declined for the 13th straight month. Further, while input cost inflation rose sharply, selling prices rose only marginally.
- US Fed minutes noted that economic activity is reviving and inflation is seeing a pickup. However, it pointed out that there would be some time until substantial progress towards Fed's goal of maximum employment and inflation at 2% can be achieved. FOMC members also highlighted that changes in the path of policy should be based primarily on observed outcomes, thus signalling no raising of rates in the near term.
