14 October 2019

### Macro developments

- World Bank has slashed India's GDP forecast in FY20 to 6% from 7.5% earlier. This was on the back of tepid consumption due to rural distress, weak investment demand and liquidity issues with NBFCs. It noted that recent economic measures announced by the government along with an accommodative monetary policy will support growth. As a result, growth is expected to recover to 6.9% in FY21 and 7.2% in FY22.
- China's exports fell more sharply (-3.2%) than anticipated (-2.8%) in Sep'19 vs (-) 1% in Aug'19. The steepest decline since Feb'19 is attributed to continuous trade friction with US and fading of "front-loading" which had cushioned Jul-Aug'19 export print. Imports too fell, by (-) 8.5% vs (-) 5.6% in Aug'19 and est.: 5.2%, driven by lower commodity prices and weak domestic demand.
- Monetary Authority of Singapore (MAS) in its semi-annual review stated that it will reduce the rate of appreciation of S\$ NEER. Width of policy band remains unchanged. Due to global risk sentiment, S\$ NEER fluctuated in the upper half of the policy band, impacting capital inflows. MAS' policy tool is setting of exchange rate rather than interest rate.
