### Macro developments

- Centre's direct tax collections on FYTD basis reached Rs 8.6tn as of Feb'20 vs FY20RE of Rs 11.7tn. Indirect tax collections at Rs 8.8tn are however slightly closer to the FY20RE of Rs 9.9tn on the back of steady GST collections. With business operations getting impacted in Mar'20, we expect shortfall in direct tax collections (currently at Rs 3.1tn).
- Retail sales in the US declined by (-) 0.5% in Feb'20 vs 0.6% in Jan'20, on MoM basis, driven by muted demand due to COVID-19. Sales in the control group; a better gauge of consumption demand remained flat. On the other hand, US industrial production rose by 0.6% in Feb'20 vs (-) 0.5% decline in Jan'20. This was on the back of sharp increase in utilities (7.1% in Feb'20 vs -4.9% in Jan'20) due to seasonality factor.
- Germany's ZEW economic sentiment index fell by 58.2 points (sharpest drop since Dec'91) to (-) 49.5 points in Mar'20. The considerable worsening of investor sentiment (similar to levels seen in CY08) is on account of global outbreak of COVID-19 and its economic impact. GDP is expected to contract in Q1 and Q2 of CY20, and the full year impact is estimated at ~100bps decline.
