### Macro developments

- According to first advance estimates for 2019-20, horticulture output is expected to rise by 0.8% to 313.3mn tn (2019-20) compared with last year. This will largely be driven by increase in the production of vegetables, aromatics and medicinal plantations. Within vegetables, production of onion, potato and tomato is expected to surge by 7.1%, 3.5% and 1.7% respectively in 2019-20 on a YoY basis.
- Business confidence in Germany remained muted with IFO index at 95.9 (est.: 97) in Jan'19 weaker than 96.3 in Dec'19. The expectation index was lower at 92.9 for Jan'19, down from previous month's 93.8. The macro print was in line with a benign growth outlook in Germany (0.6% growth recorded in CY19, weakest since CY13).
- US new home sales declined for the 3rd straight month by (-) 0.4 % on MoM basis to 694,000 in Dec'19 (est.: 730,000) vs 697,000 in Nov'19. This was on account of lack of supply of affordable homes due to land and labour shortage. Thus the median new house price rose by 0.5% in Dec'19 on YoY basis to US\$ 0.3m.
