More Loyal Than...

Countless times a purchase at our favorite store ends with a temptation to sign up for the brand's loyalty or rewards programme. While some customers believe it to be an opportunity to save, some turn it down without much thought.

Most often such programmes are aimed at invaluably picking up customer information in the form of demographics, shopping patterns, or customer preferences, which are later leveraged to persuasively push products to customers. As per McKinsey's report, executive teams that extensively use customer data and analytics to diligently make business decisions see a 126% profit improvement compared to companies that don't.

On the other end, some loyalty programmes are equally beneficial for the customer as well. Several surveys have concluded that customers that are actively engaged with brands and their loyalty programs make 90% more frequent purchases, spend 60% more, and are 5x more likely to choose the brand over a competitor. Therefore, many large scale retail houses are increasingly taking to introducing and promoting their loyalty programs.

While loyalty or reward points have been valuable to customers, the need to possess physical plastic cards or retain another set of passcodes has been a monumental hassle. Here Fintechs have come to the rescue with well-designed loyalty programmes.

Belly, headquartered in Chicago, is a leading loyalty programme and marketing solution that helps businesses enhance digital connections to strengthen customer loyalty. Another major provider of comprehensive multichannel loyalty and analytics solutions is **CrowdTwist** that drives engagement and incremental spend, leading to better customer data, stronger insight, and incrementally personalized experiences. Another interesting Fintech player, **SessionM**, provides a cloud-based solution

integrating loyalty marketing technology with marketing automation and data management capabilities, to drive personalized consumer relationships through the mobile device.

Similarly, some Fintech players back in India are attempting to disrupt a largely fragmented and unorganized industry. **One Loyalty** works in the consumer loyalty software implementation domain for retail, real estate & restaurant businesses. **Mobiquest's** flagship product **m'loyal** is another mobile-based platform for retailers and B2C firms. The app lets retailers create loyalty programmes, design redemption patterns and manage offers on multiple platforms. Further to this, **Doboz** has developed a retention-marketing platform enabling merchants / companies to create their custom currency & loyalty program through gift cards, promo codes, reward points & referral programs — without having to so much as lift a finger (or better still write a code). So far, Doboz has partnered with ICICI Bank and RBL Bank for their loyalty programme personalization platform.

Needless to say, with growing consumer demand and expectations, there is enormous potential for loyalty centric Fintechs to explore and disrupt the fragmented loyalty space. We would like to see Fintechs loyally and pleasantly continue to surprise customers with a personalized experience they didn't know existed.

More Loyal, than existing Loyalty?

BHIM app to be single point for all mobile payments? See what is on Narendra Modi government agenda

The ministry of electronics and IT (MeitY) is working on a multi-pronged strategy under which it plans to make the Bharat Interface for Money app, or BHIM, the single point for all mobile payments.

This plan includes handsets coming pre-loaded with the application as well as having a single quick response (QR) code that will be integrated with the app and is accepted by all merchants, in a bid to enable a seamless nationwide network.

Soon, you could be paying taxes via your smartphone

Taxpayers may soon have the option to use digital payment means such as UPI, digital wallets and internet banking to pay all their taxes. The move is a part of the government's objective to boost digital payments.

The Central Board of Direct Taxes is working on a new app and portal called 'My Pay' that would facilitate managing all tax-related issues as well as payments through options apart from credit and debit cards and internet banking.

Startups get 80% rebate on patent fee

More domestic and foreign startups will now be able to access the fast-track mechanism for filing patents, which will drastically cut down the time taken to obtain these rights.

The government has introduced a more liberal definition for startups to ensure that many more of them can become eligible for benefits, including lower fees, under the latest patent framework.

To boost digital payments, CAIT wants Centre to foot 'MDR' bill

To give a push to digital payment adoption, the Centre should foot the merchant discount rate (MDR) bill and pay the amount directly to banks, a top national-level traders' body said on Tuesday.

Simultaneously, the Centre should provide tax rebates and incentives for consumers of certain types of digital payments (government receipts, petrol and education) to encourage adoption of digital payments. There should also be tax rebates for merchants either in the form of sales tax/GST relief.

Customer's consent must for Aadhaar based e-KYC: IRDAI

The use of Aadhaar and accessing of personal information from the Unique Identity Authority of India (UIDAI) for e-Know Your Customer (e-KYC) purposes can be done only with the consent of a customer, the insurance regulator said.

In a clarification on the existing circulars issued on the matter, the Insurance Regulatory and Development Authority of India (IRDAI) said insurers can use the e-authentication facility being provided by the UIDAI either through fingerprint or iris scanning or through one-time password (OTP) received on the client's mobile number or on the e-mail address registered with the UIDAI.

UIDAI extends deadline for banks to set up enrollment centres

Public sector and private banks have got a month's extension to establish Aadhaar enrolment centres within their premises. The Unique Identification Authority of India (UIDAI) said on Tuesday that on the requests of the banks, it has extended the deadline till September 30, 2017.

The extension has come with the condition of "financial disincentives for every uncovered branch per month" if the banks don't meet the criteria of establishing Aadhaar centres in at least 10% of their branches.

Indian Bitcoin exchanges urge investor restraint in highly volatile market

Bitcoin prices have shed 20 per cent the past three days from about \$5,000 per unit in international market to \$4,030 on Tuesday morning. In India, however, investors are rushing to buy the crypto currency and domestic prices are quoted at 20 per cent premium.

The country's leading Bitcoin exchange, Zebpay, issued an advisory to investors saying that due to high demand and low supply of Bitcoins, both buying and selling prices are higher in India compared to international prices.

Cashless transactions are more efficient than cash transactions and will reduce opportunities for tax evasion. Besides, the government can achieve substantial savings by transferring welfare benefits in a cashless manner.

However, with the widespread adoption of digitisation comes the risk of cyber security. Robust cyber security capabilities need to be built to not only prevent malware attacks but also respond effectively in the event of incidents.
